

## Energy

The Translation People have built up an outstanding track record in the provision of translations for companies involved in the supply of energy from oil and gas, electricity, nuclear and renewable sources.

Our translations enable organisations to participate in lucrative overseas tenders, confident in the knowledge that the translations of their proposals have been treated with the same level of care and attention to detail as the original. Our translation expertise within the energy industry covers:

- safety datasheets
- health and safety information
- quality procedures
- promotional literature
- technical specifications
- plant / machinery installation documents
- websites
- press releases

We translate and typeset all world languages from Albanian to Arabic; Czech to Chinese; French to Farsi; Greek to Gujarati and Turkish to Thai through a network of tried and tested language professionals which stretches all the way around the world.

Whatever the format of your original material, our production specialists adapt your existing artwork so that your foreign language version looks as impressive as the original.

We work in an extensive range of software on both Mac and PC in European, Middle Eastern, South Asian and Far Eastern alphabets and scripts.

Our translations have been used by brands such as:

### Our portfolio of services includes:

- translation • interpreting • multilingual DTP •
- website localisation • software localisation •
- technical authoring • technical illustration •
- subtitling & voiceovers • MTPE •

### About Us

Any translation company worth its salt will tell you that it provides high quality translations carried out by native speakers, that it works with the latest technology and that it treats your material as confidential. We're no different. But we do believe that the calibre of our people gives us the edge over our competition.

As one of our clients, you'll have a direct line to an experienced account manager who will be your single point of contact. They'll identify your requirements, select and coordinate the appropriate resource team and ensure your project is delivered in the appropriate format, on time and on budget.
